Politics of the European Union in Bosnia-Herzegovina: Between Conflict and Democracy, by Doga Ulas Eralp, evaluates the European Union's ability to transform the escalating political tensions at a period where the postconflict balance of the Dayton Peace Agreement is turning increasingly unsustainable. Eralp questions whether reforms integral to the EU membership process and existing European crisis management mechanisms can liberate Bosnian politics from the help of ethno-nationalism and plant the seeds for a successful liberal democracy. Eralp's text captures the tools and history of the EU's accession strategy for Bosnia-Herzegovina and the challenges of the Dayton system as two interrelated narratives, both exploring the realities of Bosnian politics and analyzing the overall quality of Bosnian democracy. Bosnia's consociational system, the role of the international community, and the intervention of the European Union are all put under the spotlight as the institutional and political factors behind Bosnia's stagnation. The text concludes with a discussion of factors that impact the effectiveness of the European Union as an important transformative actor in Bosnia.

At the national level, political parties play an important role in making representative democracy work. They help to aggregate and communicate policy preferences, link decision-making between different legislative bodies and hold politicians accountable. In the European Union, however, the electoral connection is weak. This casts doubt on the impact of partisan politics at the European level. Are political parties able to fulfil their role as 'transmission belts' ensuring political accountability and consistent decision-making in the European Union? To answer this question we look at the micro foundations of partisan politics in the European Union. The contributions in this volume all depart from a common theoretical framework but use a wide range of empirical data and research designs, covering qualitative process-tracing, elite interview and large-N quantitative analysis. Moreover, they examine party effects in the electoral and legislative arena. Finally, the volume covers all European institutions: the Commission, the Council of the European Union, the European Council and the European Parliament. The findings enhance our understanding of the workings of decision-making in Brussels, add to the debate on the EU democratic deficit, and highlight the usefulness of drawing upon insights from the literature on Comparative Politics when studying the European Union. This book was published as a special issue of the Journal of European Public Policy.

The European Union of today cannot be studied as it once was. This original new textbook provides a much-needed update on how the EU's policies and institutions have changed in light of the multiple crises and transformations since 2010. An international team of leading scholars offer systematic accounts on the EU's institutional regime, policies, and its community of people and states. Each chapter is structured to explain the relevant historical developments and institutional framework, presenting the key actors, the current controversies and discussing a paradigmatic case study. Each chapter also provides ideas for group discussions and individual research topics. Moving away from the typical, neutral account of the functioning of the EU, this textbook will stimulate readers' critical thinking towards the EU as it is today. It will serve as a core text for undergraduate and graduate students of politics and European studies taking courses on the politics of the EU, and those taking courses in comparative politics and international organizations including the EU.
