The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

Marco Polo was hardly the only European merchant or trader who traveled to the Far East, but it was his written account of his travels that would generate extreme interest in Asia. Having described such a rich land full of desired resources, Marco Polo's travels became a source for European cartographers of the era, and they became the impetus for men like Christopher Columbus, who added his own annotations to Marco Polo's account and used it as a reference for his own legendary expedition in search of the Far East. Centuries later, historians have scoured over the account and what was written in an effort to validate its authenticity, leading to sharp debates today. The most seminal event of the last millennium might also be its most controversial. As schoolchildren have been taught for over 500 years, "In 1492 Columbus sailed the ocean blue." In October of that year, the Italian Christopher Columbus immortalized himself by landing in the New World and beginning the process of European settlement in the Americas for Spain, bringing the Age of Exploration to a new hemisphere with him. Ironically, the Italian had led a Spanish expedition, in part because the Portuguese rejected his offers in the belief that sailing west to Asia would take too long. Today Ferdinand Magellan is remembered as the first man to circumnavigate the globe, an ironic legacy given that he died half a world away from completing that journey. But though it ended catastrophically for Magellan and most of his crew, his expedition accomplished its objective, and in economic terms, the opening up of new trade routes with Asia was a more significant development than the conquest of the Americas for the Europeans of the early 16th century. The life of Sir Francis Drake, or, more precisely, the tale of it, is one of those prime examples that history is written by the winners. Drake was the most famous sailor of the Elizabethan Era, and he has long been considered a hero by the English. His successes against the Spanish as a captain and a privateer were legendary, and Drake was celebrated for fighting the Queen's enemies, sinking their ships, and capturing the treasure that would otherwise be used to finance attacks on England. Drake vigorously pursued every mission given to him by Elizabeth I, and brought all his skill, experience and training to bear against her enemies. He was recognized at court for his valor, praised in story and song, and remembered for the kind of personality and esprit de corps that the English have long desired and celebrated in their military heroes.

Why do even well-educated people understand so little about mathematics? And what are the costs of our innumeracy? John Allen Paulos, in his celebrated bestseller first published in 1988, argues that our inability to deal rationally with very large numbers and the probabilities associated with them results in misinformed governmental policies, confused personal decisions, and an increased susceptibility to pseudoscience of all kinds. Innumeracy lets us know what we're missing, and how we can do something about it. Sprinkling his discussion of numbers and probabilities with quirky stories and anecdotes, Paulos ranges freely over many aspects of modern life, from contested elections to sports stats, from stock scams and newspaper psychics to diet and medical claims, sex discrimination, insurance, lotteries, and drug testing. Readers of Innumeracy will be rewarded with scores of astonishing facts, a fistful of powerful ideas, and, most important, a clearer, more quantitative way of looking at their world.

"Jehan de Mandeville", translated as "Sir John Mandeville", is the name claimed by the compiler of a singular work of supposed travels, written in Anglo-Norman French, and published between 1357 and 1371.By aid of translations into many other languages it acquired extraordinary popularity. Despite the extremely unreliable and often fantastical nature of the travels it describes, it was used as a work of reference - Christopher Columbus, for example, was heavily influenced by both this work and Marco Polo's earlier Il Milione (Adams 53).

All profits from the sale of Shiftability will be donated to charity water.org. Acclaimed business leaders Mitch Little and Hendre Coetzee share their decades of expertise in this innovative guidebook focused on helping you succeed in the sales force. The ways we do business and engage with customers are constantly changing in our high-tech, global world. Sales professionals must also change their methods to reach clients. In their book, Mitch and Hendre show how to achieve the mind-set shift you need first in order to have the capacity to change your methodologies. Mitch's expertise comes from leading sales and marketing teams at Microchip Technology, which reached its one-hundredth consecutive quarter of profitability in 2015. Hendre is a transformation specialist and advises business executives and boards on reaching their full potential. Together, these experts identified six core shifts—some surprising—that will empower sales professionals and lead to success. The sales world will continue to undergo dramatic changes. New strategies and methods are essential, but they require the right mind-set. Shiftability lays the necessary mental groundwork sales professionals need in order to implement these changes in methodology and thrive in a new environment. Brent Adamson, author of The Challenger Sale and The Challenger Customer, reiterates the importance of adaptability in the sales profession in his foreword.

Start a house cleaning business with this step-by-step guide and be up and running in one week. Back in the olden days before the internet was really popular and you could Google search anything, there was trial and error. If you wanted to start a house cleaning business from scratch you could, but it was rarely an overnight success for anybody. Big success was tossed to the cleaning service franchisees who could afford the fancy training, and well-built brands, while the mom and pop cleaning services were left to figure it out on their own. Good news - times have changed. As an independent house cleaner, you no longer have to wade through endless Pinterest boards for tips and ideas on how to start a house cleaning business. Angela Brown built from scratch one of the most successful independently owned and operated house cleaning companies in the Southeastern United States. If you are serious about success in the cleaning service industry, you should sign up for her free tips, tricks and time saving hacks by joining the Savvy Cleaner email list at: savvycleaner.com/tips and you follow her blog at: AskaHouseCleaner.com She has trained a multitude of independent house cleaners how to take their business from day one through expansion and enormous growth. In this step-by-step guide she'll show you: How to set up your home office What office supplies you are going to need Ideas for your company logo How to choose your company name How to choose a uniform Tips on creating your company image and brand How to set your rules and policies How to choose a territory Everything you need to know about creating flyers, worksheets and why you need them. How to bid jobs, what to charge, What kind of car you need, Confidence builders & how to build instant credentials, Bonding, insurance The magic of the Mulligan, How to get an endless stream of referrals, how much you should pay for referral fees, How to never have any billing and collections, and how to always get paid and on time. (There is a reason they call Angela Brown "The House Cleaning Guru.") If you're here because you have an interest in house cleaning or in upgrading your life and you want to start a house cleaning business, welcome. House cleaning business is a 49 billion dollar a year industry that is nearly recession proof - when times get hard, people work more hours to pay the bills, they have less time at home to clean, so they outsource their cleaning - which means more business for you and me. Another awesome reason to start a house cleaning business is this: unlike a regular 9 to 5 job if you get fired, you're not out of work. You simply add another customer into your new available time slot and keep going. And you will learn here how to do such an amazing job, that you will never get fired, and your clients will never want you to leave. Franchise or Start a house cleaning business? The gripping true story of one man's struggles through the terrifying highs and crushing lows of bipolar disorder. In Birdies, Bogeys, and Bipolar Disorder, author and professional golfer Michael Wellington recounts a heartbreaking story of not just hitting, but skidding along rock bottom as he struggles to control a condition that for a long time controlled him: bipolar disorder. With the help of his family, a few amazing friends, and the game of golf, he has regained balance and can now share his story. The millions of people in the United States who suffer some form of mood disorder will not only find the author's story relatable, educational, and hopeful but can also benefit from Michael's experience to help control their own disorder. Michael offers the Fourteen Clubs, a bag of tools to keep the bipolar mind in balance. Using these clubs daily can help you avoid both mania and depression.

Will Jelbert had what many people would consider the ideal life: a well paying job, a beautiful wife and a great apartment, but he still wasn't happy. One day the life he knew came to an abrupt end when he was thrown from his bike, face first into the sidewalk of a Sydney street. After a year in recovery, Jelbert decided to dedicate the next three years to a happiness research project. The result: The Happiness Animal. The world's first dedicated exercise guide to happiness condenses the latest applied positive psychology research into a guide to five muscles for happiness. For each muscle, Jelbert provides five simple exercises that you can apply to your everyday life, without having to adjust your schedule. Perfect for people in all walks of life, the exercises in The Happiness Animal will move you toward profound personal change and act as a driving force for your happiness.. Editorial Reviews: * * * * * "Will has an incredible ability to say things that are logical and obvious, although without somebody pointing them out in the clear way he has done, most of us don't ever think them. He identifies the power of awareness, but before I read his book I was not even aware of many of my own thoughts" - Danny Lawrence, BBC * * * * * "Will has captured an immense understanding of the inner workings of society's struggle to find happiness with a whole hearted and honest truth. The exercises explained are an excellent route back to the inner being of happiness. A must read for everyone!" - Sadie Oliver, LIFE magazine * * * * * "Will writes with honesty, authenticity and animation that allows the words on each page to come alive and live within the reader" - Lucy Proud, The Art of Being Voted "Best Happiness Book" on Goodreads
