"Check out that baby bump!" Online and print magazines, television shows, and personal blogs are awash with gossip and speculation about pregnant celebrities. What drives our cultural obsession with celebrity baby bumps? Pregnant with the Stars examines the American fascination with, and judgment of, celebrity pregnancy, and exposes how our seemingly innocent interest in "baby bumps" actually reinforces troubling standards about femininity, race, and class, while increasing the surveillance and regulation of all women in our society. This book charts how the American understanding of pregnancy has evolved by examining pop culture coverage of the pregnant celebrity body. Investigating and comparing the media coverage of pregnant celebrities, including Jennifer Garner, Angelina Jolie, Beyoncé Knowles, Kristen Bell, M.I.A., Jodie Foster, and Mila Kunis, Renée Cramer shows us how women are categorized and defined by their pregnancies. Their stories provide a paparazzi-sized lens through which we can interpret a complex set of social and legal regulations of pregnant women. Cramer exposes how cultural ideas like the "rockin' post-baby body" are not only unattainable; they are a means of social control. Combining cultural and legal analysis, Pregnant with the Stars uncovers a world where pregnant celebrities are governed and controlled alongside the recent, and troubling, proliferation of restrictive laws aimed at women in the realm of reproductive justice and freedom. Cramer asks each reader and cultural consumer to recognize that the seeing, judging, and discussion of the "baby bump" isn't merely frivolous celebrity gossip—it is an act of surveillance, commodification, and control.

The "she" stories begin while traveling alone in Paris. They are a journey of one woman, and the many she. She of the stories resists a name. She doesn't really' know why but she honors her knowing anyway. She simply invites each she to emerge as they bubble up inside of her as she travels along and alone on this fifteen day trip. As she travels, she recognizes common themes, patterns, her thinking. She also learns to trust a feeling energy versus a thinking energy to lead her forward and help her in her choices. This feeling energy helps her make connections to the humanity all around her. Beyond the barriers of language is a silent language: the language of the smile, of softness, of warmth and the language to bridge to one other. Her selves emerge and as she observes them and their thought-filled ways, they fall away quietly, unleashing something unexpected at the end of her trip. There is a silent agreement that we all have to release this. The She Stories are for those who wonder about their own workings, wherever they are in their life. All of us have many selves that live inside of us and to root them out, we must be very intentional as we move in relationship within the world. It seems we must do this alone, yet know that we are never alone. Where does one begin their quest? .to better know one's own process? better find one's own way? .become aware of what one is drawn to? It seems through a non-linear inner listening process--a continual exploration and reflection of the self in everyday living as well as in new places and with new people. Importantly, to become aware of our own process through the stories we tell ourselves.
