Nicky Drayden Books & Biography - harpercollins.ca

It should have been exhausting, but Nicky Drayden ushered me through the story in such a way that I was always hungry for the next thing. And the next. And the next. If you're looking for a big story with big characters doing their best, I highly recommend THE PREY OF GODS. The narration by Prentice Onayemi is wonderful.

From a new voice in the tradition of Lauren Beukes, Ian McDonald, and Nnedi Okorafor comes The Prey of Gods, a fantastic, boundary-challenging tale, set in a South African locale both familiar and yet utterly new, which braids elements of

science fiction, fantasy, horror, and dark humor. In South Africa, the future looks promising. Personal robots are making life easier for the working class. The government is harnessing renewable energy to provide infrastructure for the poor. And in the bustling coastal town of Port Elizabeth, the economy is booming thanks to the genetic engineering industry which has found a welcome home there. Yes—the days to come are looking very good for South Africans. That is, if they can survive the present challenges: A new hallucinogenic drug sweeping the country . . . An emerging AI uprising . . . And an ancient demigoddess hellbent on regaining her former status by preying on the blood and sweat (but mostly blood) of every human she encounters. It's up to a young Zulu girl powerful enough to destroy her entire township, a queer teen plagued with the ability to control minds, a pop diva with serious daddy issues, and a politician with even more serious mommy issues to band together to ensure there's a future left to worry about. Fun and fantastic, Nicky Drayden takes her brilliance as a short story writer and weaves together an elaborate tale that will capture your heart . . . even as one particular demigoddess threatens to rip it out.

"Don't be alarmed - that dizzy pleasurable sensation you're experiencing is just your brain slowly exploding from all the wild magnificent worldbuilding in Nicky Drayden's *Escaping Exodus*. I loved these characters and this story, and so will you." - Sam J. Miller, Nebula-Award-winning author of *The Art of Starving* and *Blackfish City* The Compton Crook award-winning author of *The Prey of Gods* and *Temper* returns with a dazzling stand-alone novel, set in deep space, in which the fate of humanity rests on the slender shoulders of an idealistic and untested young woman—a blend of science fiction, dark humor, and magical realism that will appeal to fans of Charlie Jane Anders, Jeff VanderMeer, and Nnedi Okorafor. Earth is a distant memory. Habitable extrasolar planets are still out of reach. For generations, humanity has been clinging to survival by establishing colonies within enormous vacuum-breathing space beasts and mining their resources to the point of depletion. Rash, dreamy, and unconventional, Seske Kaleigh should be preparing for her future role as clan leader, but her people have just culled their latest beast, and she's eager to find the cause of the violent tremors plaguing their new home. Defying social barriers, Seske teams up with her best friend, a beast worker, and ventures into restricted areas for answers to end the mounting fear and rumors. Instead, they discover grim truths about the price of life in the void. Then, Seske is unexpectedly thrust into the role of clan matriarch, responsible for thousands of lives in a harsh universe where a single mistake can be fatal. Her claim to the throne is challenged by a rival determined to overthrow her and take control—her intelligent, cunning, and confident sister. Seske may not be a born leader like her sister, yet her unorthodox outlook and incorruptible idealism may be what the clan needs to save themselves and their world.

A Publishers Weekly Best Book of 2018! A Vulture Best Sci-Fi and Fantasy Book of 2018! In a land similar to South Africa, twin brothers are beset by powerful forces beyond their understanding or control in this thrilling blend of science fiction, horror, magic, and dark humor—evocative of the works of Lauren Beukes, Ian McDonald, and Nnedi Okorafor—from the author of *The Prey of Gods*. Two brothers. Seven vices. One demonic possession. Can this relationship survive? Auben Mutze has more vices than he can deal with—six to be exact—each branded down his arm for all the world to see. They mark him as a lesser twin in society, as inferior,

but there's no way he'll let that define him. Intelligent and outgoing, Auben's spirited antics make him popular among the other students at his underprivileged high school. So what if he's envious of his twin Kasim, whose single vice brand is a ticket to a better life, one that likely won't involve Auben. The twins' strained relationship threatens to snap when Auben starts hearing voices that speak to his dangerous side—encouraging him to perform evil deeds that go beyond innocent mischief. Lechery, deceit, and vanity run rampant. And then there are the inexplicable blood cravings. . . . On the southern tip of an African continent that could have been, demons get up to no good during the time of year when temperatures dip and temptations rise. Auben needs to rid himself of these maddening voices before they cause him to lose track of time. To lose his mind. And to lose his . . . TEMPER

The Compton Crook Award-winning author weaves her trademark blend of science fiction and dark humor in this dazzling story that continues the imaginative saga begun in *Escaping Exodus*, in which a society lives in the belly of a beast--and an entire civilization's survival depends on a pair of uneasy allies who must come together for one epic battle. Nearly a thousand years removed from Earth, the remnants of humanity cling to existence inside giant, space faring creatures known as the Zenzee. Abused and exploited by humans for generations, these majestic animals nearly went extinct, but under the command of its newly minted ruler, Doka Kaleigh, life in the Parados I has flourished. Thanks to careful oversight and sacrifice by all of its crew, they are now on the brink of utopia, and yet Doka's rivals feel threatened by that success. The Senate allowed Doka to lead their people believing he'd fail spectacularly--a disaster that would cement the legitimacy of their long-standing matriarchy. Despite vocal opposition and blatant attacks on his authority, Doka has continued to handle his position with grace and intelligence; he knows a single misstep means disaster. When a cataclysmic event on another Zenzee world forces Doka and his people to accept thousands of refugees, a culture clash erupts, revealing secrets from the past that could endanger their future. For Doka, the stakes are bigger and more personal than ever before--and could cost him his reign and his heart. He has fallen for the one woman he is forbidden to love: his wife, Seske. Doka and Seske must work closely together to sway the other Zenzee worlds to stop their cycles of destruction. But when they stumble upon a discovery that can transform their world, they know they must prepare to fight a battle where there can be no winners, only survivors.

A scavenger robot wanders in the wasteland created by a war that has destroyed humanity in this evocative post-apocalyptic "robot western" from the critically acclaimed author, screenwriter, and noted film critic. It's been thirty years since the apocalypse and fifteen years since the murder of the last human being at the hands of robots. Humankind is extinct. Every man, woman, and child has been liquidated by a global uprising devised by the very machines humans designed and built to serve them. Most of the world is controlled by an OWI—One World Intelligence—the shared consciousness of millions of robots, uploaded into one huge mainframe brain. But not all robots are willing to cede their individuality—their personality—for the sake of a greater, stronger, higher power. These intrepid resisters are outcasts; solo machines wandering among various underground outposts who have formed into an unruly civilization of rogue AIs in the wasteland that was once our world. One of these resisters is Brittle, a scavenger robot trying to keep a deteriorating mind and body functional in a world that has lost all meaning. Although unable to experience emotions like a human, Brittle is haunted by the terrible crimes the robot population perpetrated on humanity. As Brittle roams the Sea of Rust, a large swath of territory that was once the Midwest, the loner robot slowly comes to terms with horrifyingly raw and vivid memories—and nearly unbearable guilt. Sea of Rust is both a harsh story of survival and an optimistic adventure. A vividly imagined portrayal of ultimate destruction and desperate tenacity, it boldly imagines a future in which no hope remains, yet where a humanlike AI strives to find purpose among the ruins.

The world still needs heroes. Are you with us? Enter the first-ever original novel for Overwatch, the worldwide gaming sensation from Blizzard Entertainment! In the technologically advanced African city of Numbani, in the not-so-distant future, humans live in harmony with humanoid robots known as omnics. But when a terrorist tries to shatter that unity, a hero named Efi Oladele rises! Efi has been making robots since she was little -- machines to better her community and improve people's lives. But after she witnesses Doomfist's catastrophic attack on the city's OR15 security bots, Efi feels the call to build something greater: a true guardian of Numbani. While Doomfist sows discord between humans and omnics, Efi engineers an intelligent and compassionate robot, Orisa, named after the powerful spirits who guide her people. Orisa has a lot to learn before she's ready to defeat Doomfist, but Efi has some learning to do, too, especially when it comes to building -- and being -- a hero. With Doomfist rallying his forces, and the military powerless to stop him, can Efi mold Orisa into the hero of Numbani before it's too late? This action-packed novel features the fan-favorite characters Efi, Orisa, Doomfist, and Lúcio in an all-new, original story straight from the minds of the Overwatch game team and critically acclaimed author Nicky Drayden!

"Astonishing . . . Explores the vast underground legacy of our own desires. This is the must-read book of the year." —Rene Denfeld, bestselling author of *The Child Finder* A richly imagined debut novel about a traveling salesman and the small town he changes forever If someone offered you a magic elixir that could conjure any dream you wanted . . . would you take it? Traveling salesmen like Robert Owens have passed through Evie Dawson's town before, but none of them offered anything like what he has to sell: dreams, made to order, with satisfaction guaranteed. Soon after he arrives, the community is shocked by the disappearance of Evie's young son. The townspeople, shaken by the Dawson family's tragedy and captivated by Robert's subversive magic, begin to experiment with his dreams. And Evie, devastated by grief, turns to Robert for a comfort only he can sell her. But the dream peddler's wares awaken in his customers their most carefully buried desires, and despite all his good intentions, some of them will lead to disaster. Gorgeously told through the eyes of Evie, Robert, and a broad cast of fully realized characters, *The Dream Peddler* is an imaginative, moving novel of overcoming loss and reckoning with the longings we keep secret.
