Based on the highly successful Primary Mathematics series from Singapore. Designed to equip students with a strong foundation in mathematics and critical thinking skills, this program offers an integrated solution to learning needs in the classroom for grade 4.

If you are a primary trainee, you must demonstrate a knowledge of mathematics to be recommended for QTS. This popular, widely recommended text helps you audit your knowledge of mathematics and understand what learning you need to pass your course. A rigorous test helps you identify your strengths and weaknesses and can be revisited at key stages in your course as a tool to monitor and evaluate progress. The fourth edition has been updated in line with the new National Curriculum, includes more information on expanding and developing your knowledge of mathematics and is linked to the newest Teachers' Standards.

thinking skills, the program offers an integrated solution to different learning needs in the classroom for Grades 1 to 5.

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

Based on the Primary Mathematics series from Singapore. Designed to equip students with a strong foundation in mathematics and critical thinking skills, the program offers an integrated solution to different learning needs in the classroom.

This book supports trainees on primary initial teacher training courses where a secure knowledge and understanding of mathematics is required for the award of Qualified Teacher Status (QTS). A rigorous test enables trainees to identify their strengths and weaknesses in mathematics and this can be revisited in order to monitor and evaluate progress towards QTS. Trainees are able to direct their studies more usefully and quickly develop confidence in topics they find difficult. This edition is fully up to date with the 2007 QTS Standards.
