Proton Savvy - Vehicle speed sensor problem - YouTube
I think only way to get blue TDC sensor to work is to file down bolt hole to make closer to crank shaft gear on Savvy. It 100% cause of the problems and I want to save other people time who own Proton and buy standard TDC part from Renault but maybe made for European metal casting engine, not from Malaysia Proton D4F engine.

Proton Workshop Repair | Owners Manuals (100% Free)
The Savvy is Proton's first entry into the city car market. The Savvy is also targeting younger buyers, rather than the traditional older buyers that have made up the largest share of its sales. The competition is strong in this sector however, with budget brands competing with small cars from the large manufacturers.

Car Reviews: Proton Savvy Style - The AA
Proton Savvy P1640 Possible Solution : The crankshaft sensor signals the fuel injection computer or the ignition control when the cylinders are firing. This causes the ignition coil to provide a spark and the injector to inject fuel into each cylinder at the right time.If either sensor isn't working correctly, the car will run rough and the engine will be less efficient.
