The key  
difference is  
that the default  
text processing  
behaviour in

Python 3 aims to  
detect text  
encoding  
problems as  
early as  
possible -  
either when

Data Processing  
with Python

Python is the  
ideal language  
to process data.

It supports JSON  
and XML out of  
the box, but  
there are also  
many libraries  
to aid you with  
processing data.
