Radiographic Positioning Guide - Page 2 of 5 and ...

The terms used to describe radiographic positioning can be confusing and depend on the area being imaged. When describing the way the beam enters and exits the body or head, it is appropriate to use ventrodorsal or dorsoventral. The terms caudocranial and craniocaudal are used to describe the way the beam enters and exits a forelimb or hindlimb. Markers should always be placed to indicate patient position and/or beam direction.
