Every day we interact with thousands of consumer products. We not only expect them to perform their functions safely, reliably, and efficiently, but also to do it so seamlessly that we don't even think about it. However, with the many factors involved in consumer product design, from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost, well, the process just seems to get more complex. Edited by well-known and well-respected experts, the two-volumes of Handbook of Human Factors and Ergonomics in Consumer Product Design simplify this process. The first volume, Human Factors and Ergonomics in Consumer Product Design: Methods and Techniques, outlines the how to incorporate Human Factors and Ergonomics (HF/E) principles and knowledge into the design of consumer products in a variety of applications. It discusses the user-centered design process, starting with how mental workload affects every day interactions with consumer products and what lessons may be applied to product design. The book then highlights the ever-increasing role of information technology, including digital imaging, video and other media, and virtual reality applications in consumer product design. It also explores user-centered aspect of consumer product development with discussions of user-centered vs. task-based approach, articulation and assessment of user requirements and needs, interaction with design models, and eco design. With contributions from a team of researchers from 21 countries, the book covers the current state of the art methods and techniques of product ergonomics. It provides an increased knowledge of how to apply the HF/E principles that ultimately leads to better product design.

"A ready reference aid and an inspiration to designers . All in all the best book now available on symbols." --Library Journal This unparalleled reference represents a major achievement in the field of graphic design. Famed industrial designer Henry Dreyfuss recognized the importance of symbols in communicating more quickly and effectively; for many years he and his staff collected and codified graphic symbols as they are used in all walks of life throughout the world. The result is this "dictionary" of universally used graphic symbols. Henry Dreyfuss designed this sourcebook to be as practical and easy to use as possible by arranging the symbol information within ingeniously devised sections: Basic Symbols represents a concise and highly selective grouping of symbols common to all disciplines (on-off, up-down, etc.). Disciplines provides symbols used in accommodations and travel, agriculture, architecture, business, communications, engineering, photography, sports, safety, traffic controls, and many other areas. Color lists the meanings of each of the colors in various worldwide applications and cultures. Graphic Form displays symbols from all disciplines grouped according to form (squares, circles, arrows, human figures, etc.) creating a unique way to identify a symbol out of context, as well as giving designers a frame of reference for developing new symbols. To make the sourcebook truly universal, the Table of Contents contains translations of each of the section titles and discipline areas into 17 languages in addition to English.

Leah Anderle is trying to get on with her life now that both of her parents are deceased. She occupies her days working as a paralegal in a prestigious Chicago law firm and spends her nights attempting to dissect flashbacks about her mother that continually haunt her. On the same day she seeks assistance from a private investigator, a junior partner in the law firm asks her out to dinner to discuss a case. Alan Parkin is the handsome nephew of one of the founders of Marsden, Willett, and Desmond. Although attracted to him, Leah has no expectations for their dinner date other than to hash out legal strategies. As one date turns into several, their friendship transforms into love, dismaying Horace Marsden who is determined to prevent his nephew, Alan, from making a mistake. But everything changes when a surprising discovery forces Leah to make difficult decisions, and a series of events causes Alan to question his commitment to the legal profession and his ability to function in the so-called real world. Finding Joy is a poignant story of love, loss, disappointment, and failure as a young woman and her soul mate search for forgiveness, happiness, and themselves.

Whether you're designing consumer electronics, medical devices, enterprise Web apps, or new ways to check out at the supermarket, today's digitally-enabled products and services provide both great opportunities to deliver compelling user experiences and great risks of driving your customers crazy with complicated, confusing technology. Designing successful products and services in the digital age requires a multi-disciplinary team with expertise in interaction design, visual design, industrial design, and other disciplines. It also takes the ability to come up with the big ideas that make a desirable product or service, as well as the skill and perseverance to execute on the thousand small ideas that get your design into the hands of users. It requires expertise in project management, user research, and consensus-building. This comprehensive, full-color volume addresses all of these and more with detailed how-to information, real-life examples, and exercises. Topics include assembling a design team, planning and conducting user research, analyzing your data and turning it into personas, using scenarios to drive requirements definition and design, collaborating in design meetings, evaluating and iterating your design, and documenting finished design in a way that works for engineers and stakeholders alike.

In Summer 2010, LeBron James took his talents to South Beach, bringing with him Chris Bosh to partner with Miami Heat superstar Dwyane Wade. The Big Three talked of winning multiple NBA championships and enormous expectations began to build—pressure that grew even stronger when the Heat lost the 2011 NBA Finals to the Dallas Mavericks. There were rumblings about breaking up the team, or firing coach Erik Spoelstra, or both. New players joined the cast, and with James producing a league MVP season, the Heat rolled into the Eastern Conference finals despite injuries that limited the effectiveness of Bosh and Wade. Winning a championship would test the team like never before. Down 3 games to 2 in the East finals after losing at home in Game 5, Miami faced elimination and a defining moment for James. A spectacular performance by James forced a Game 7 in Miami, where a victory sent the Heat on to face the Oklahoma City Thunder—and clash with superstar Kevin Durant. Relive the Heat's march to the NBA championship with stories, columns and photos from the South Florida Sun-Sentinel. From the unsung heroes to James's MVP performance and the post-title celebration, it's a story of validation, vindication and the ultimate victory.

"In [this book], noted scientist Seymour Garte proves that on the whole, human beings have worked harder to improve our environment than we can ever imagine. Using scientific evidence and a balanced, middle of the road approach, [he] explodes many of the popular myths about human health and the environment. He provides the facts to show that scientific research, environmental activism, and government regulation have produced steady progress in dealing with pollution, poor health, loss of natural resources, and other negative byproducts of our industrial society. With the compassion and aid of dedicated environmentalists, activists, and politicians, we have actually made incredible progress in areas like public health, AIDS research, poverty, and feeding the hungry."--Jacket.

For lovers of sci-fi thrillers, alien invasion stories, space opera, and sprawling first contact science fiction, this is an unforgettable post-apocalyptic epic about perseverance and survival in a harsh new world where humanity is just another item on the menu... First Contact doesn't go as anyone expected. Now they own us. The Legend of ZERO: Forging Zero is the epic journey of 14-year-old Joe Dobbs in a post-apocalyptic universe following a massive galactic empire's invasion of Earth. The oldest of the children drafted from humanity's devastated planet, Joe is impressed into service by the alien Congressional Ground Force—and becomes the unwitting centerpiece in a millennia-long alien struggle for independence. Once his training begins, one of the elusive and prophetic Trith appears to give Joe a spine chilling prophecy that the universe has been anticipating for millions of years: Joe will be the one to finally shatter the vast alien government known as Congress. And the Trith cannot lie.... But first Joe has to make it through bootcamp.

When Ellen and her sister, Malinda, are forced out of the only home they've ever known by a local banker after the death of their father, they answer an advertisement placed by Harriett Long for mail order brides. Ellen chooses to marry the sheriff of a small town in Colorado while Malinda agrees to marry his brother, a banker. When they arrive, each sister is immediately drawn to one of the brothers....too bad it's the wrong one! Malinda thinks her life is over after the death of her father and her subsequent eviction from the only home she's ever known. She, along with her sister, answers an advertisement for mail order brides and their lives change. She agrees to marry a banker in a small town in Colorado, because she refuses to be afraid of where her next meal will come from ever again. When she arrives in Colorado, she immediately falls for the handsome gentleman who picks her up at the train station, but he's her sister's fiance, not hers!

"My mother had four daughters by four different men." There's only one way Shelby and her sisters can describe their mother: She's a sexpot. Helen Kimura collects men (and loans, spending money, and gifts of all kinds) from all over the country. Sure, she's not your typical role model, but she's also not just a pretty face and nail polish. She is confident and brave; she lives life on her own terms, and her four daughters simply adore her. These girls have been raised outside the traditional boundaries. They know how to take the back exit. They know how to dodge crazed lovers in highway car chases. They do not, however, know how to function without one another. Then suddenly they must. A late-night phone call unexpectedly shreds the family apart, catapulting the girls across the country to live with their respective fathers. But these strong-willed sisters are, like their mother, determined to live life on their own terms, and what they do to pull their family back together is nothing short of beautiful. At turns wickedly funny and insistently thought-provoking, Outside Beauty showcases Cynthia Kadohata's unerring ability to explore the bonds that bind.

As we see a shift of old forms that were once the foundations of our daily lives, parents--who must prepare the next generation to meet the changing world--have more questions today than ever before. Although our cultural values and family structures may change, it is the atmosphere in the home that continues to form the foundation of a child's life. In Heaven on Earth, parent and educator Sharifa Oppenheimer reveals how parents can make the home environment warm, lively, loving, and consistent with their highest ideals. Heaven on Earth balances a theoretical understanding of child development with practical ideas, resources, and tips that can transform family life. Readers will learn how to create the regular life rhythms needed to establish a foundation for learning; how to design indoor play environments that allow children the broadest development of skills; and how to create outdoor play spaces that encourage vigorous movement and a wide sensory palette. Through art, storytelling, and the festival celebrations, this book is an invaluable guide to building a "family culture" based on the guiding principle of love--a culture that supports children and encourages the free development of each unique soul. Sharifa Oppenheimer offers a gift from the heart. Heaven on Earth is a practical, inspiring resource that brings the author's informed, intuitive understanding of young children into the heart of the home. "Sharifa Oppenhiemer has given the world a great gift in the pages of this book. The important child-development information is exquisitely combined with the best 'How-to's' I have seen in any book for parents. Her book, is a ready guide that insures joyful, enthusiastic children who learn easily and contribute to their families and society for a lifetime. I have delighted in every page and feel this is absolutely A must read for parents, grandparents, teachers, and perhaps everyone who will ever touch the life of a child." --Carla Hannaford, Ph.D., biologist and international educational consultant to 32 countries and author of Smart Moves: Why Learning Is Not All in Your Head and Awakening the Child Heart, Handbook for Global Parenting "This delightful book will be a wonderful resource for parents. They will certainly appreciate its warm, friendly, personal, and reassuring tone. I would have loved such a book when I was a young mother! For those whose children already attend Waldorf programs, it provides a helpful resource for creating a bridge between home and kindergarten. For others, this lovely book offers wonderful glimpses into the wise and nurturing practices of Waldorf early childhood education. In a world where childhood is increasingly 'media'ted and 'adult'erated, this book offers much-needed support for the protection of childhood. " --Susan Howard, chairperson, Waldorf Early Childhood Association of North America and coordinator, International Association for Steiner/Waldorf Early Childhood Education "Being a parent is a challenging assignment, but with the help of Sharifa Oppenheimer's book, Heaven on Earth, our work immediately becomes easier. This book is both heartfelt and practical. It offers sound parenting principles with down-to-earth examples of how to raise children with both insight and grace." --Jack Petrash, director, Nova Institute, and author, Navigating the Terrain of Childhood: A Guidebook for Meaningful Parenting and Heartfelt Discipline
