Based on British and Iranian sources, this book investigates the background and goals of the coup in Iran, examining how British foreign and domestic agents interfered with Iran's internal affairs between the nationalization of Iran's oil in 1951 until its failure in 1953 with the overthrow of Prime Minister Mossadegh. How and why was Iran's democratically elected government ousted in 1953? Most studies refer to a 'CIA-led' operation. This study analyses how British agents used the Shah, the ancient Persian Durbar, Majlis deputies, Islamic clergy, and Iranian military officers in the overthrow of the first democratically elected Prime Minister, and highlights how Britain used the 'Communist menace' as a pretext for protecting its oil interests and persuaded the Americans to orchestrate the coup. This close interaction between British colonial interests, American Cold War goals and Iranian politics ultimately defeated the democratic aspirations of Iran's people.

For more than a century, oil has been the engine of growth for a society that delivers an unprecedented standard of living to many. We now take for granted that economic growth is good, necessary, and even inevitable, but also feel a sense of unease about the simultaneous growth of complexity in the processes and institutions that generate and manage that growth. As societies grow more complex through the bounty of cheap energy, they also confront problems that seem to increase in number and severity. In this era of fossil fuels, cheap energy and increasing complexity have been in a mutually-reinforcing spiral. The more energy we have and the more problems our societies confront, the more we grow complex and require still more energy. How did our demand for energy, our technological prowess, the resulting need for complex problem solving, and the end of easy oil conspire to make the Deepwater Horizon oil spill increasingly likely, if not inevitable? This book explains the real causal factors leading up to the worst environmental catastrophe in U.S. history, a disaster from which it will take decades to recover.

The world is about to run out of cheap oil and change dramatically. Within the next few years, global production will peak. Thereafter, even if industrial societies begin to switch to alternative energy sources, they will have less net energy each year to do all the work essential to the survival of complex societies. We are entering a new era, as different from the industrial era as the latter was from medieval times. In *The Party's Over*, Richard Heinberg places this momentous transition in historical context, showing how industrialism arose from the harnessing of fossil fuels, how competition to control access to oil shaped the geopolitics of the twentieth century and how contention for dwindling energy resources in the twenty-first century will lead to resource wars in the Middle East, Central Asia and South America. He describes the likely impacts of oil depletion and all of the energy alternatives. Predicting chaos unless the United States—the world's foremost oil consumer—is willing to join with other countries to implement a global program of resource conservation and sharing, he also recommends a "managed collapse" that might make way for a slower-paced, low-energy, sustainable society in the future. More readable than other accounts of this issue, with fuller discussion of the context, social implications and recommendations for personal, community, national and global action, Heinberg's updated book is a riveting wake-up call for human-kind as the oil era winds down, and a critical tool for understanding and influencing current US foreign policy.

This book analyzes the recent development of Gulf capitalism through to the aftermath of the 2008 economic crisis. Situating the Gulf within the evolution of capitalism at a global scale, it presents a novel theoretical interpretation of this important region of the Middle East political economy.

Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power. Praise for *Britain, France and the Decolonization of Africa* '...this ambitious volume represents a significant step forward for the field. As is often the case with rich and stimulating work, the volume gestures towards more themes than I have space to properly address in this review. These include shifting terrains of temporality, spatial Scales, and state sovereignty, which together raise important questions about the relationship between decolonization and globalization. By bringing all of these crucial issues into the same frame, Britain, France and the Decolonization of Africa is sure to inspire new thought-provoking research.' - *H-France* vol. 17, issue 205

This book represents the twelfth edition of the IMPORTANT leading reference work MAJOR COMPANIES OF THE ARAB WORLD. All company entries have been entered in MAJOR THE ARAB WORLD. COMPANIES OF THE ARAB WORLD absolutely free This volume has been completely updated of charge, thus ensuring a totally objective approach compared to last year's edition. To all those Academic Publishers Group, is a publishing individuals who gave us help as well, we are similarly organisation specialising in the research and very grateful. publication of business and technical information for industry and commerce in many parts of the Definition of a major company world.

Saudi Arabia is witnessing unprecedented progress in the field of higher education. Even though the country opened its first university in 1957, so far there seems to be little English scholarly writing about Saudi education in general and higher education in particular. The current expansion of Saudi Arabia s higher-education system has put a spotlight on this serious gap in the international literature. This book helps to fill this lacuna through the work of 16 scholars who have contributed to the development of the Saudi education system. In so doing, the book reveals areas where more research is required and thus provides a useful starting point for education scholars. This anthology is unique in that it is the first to offer a comprehensive perspective on the current knowledge base pertaining to Saudi higher education as well as to the ongoing efforts to introduce reforms.

The recent worldwide boom in industrial construction and the corresponding billions of dollars spent every year in industrial, oil, gas, and petrochemical and power generation project, has created fierce competition for these projects. Strong management and technical competence will bring your projects in on time and on budget. An in-depth explorat

This fully revised and updated edition includes twelve new chapters on contemporary topics such as ecological democracy, Native studies, inquiry teaching, and Islamophobia. The Social Studies Curriculum, Fourth Edition updates the definitive overview of the issues teachers face when creating learning experiences for students in social studies. The book connects the diverse elements of the social studies curriculum—civic, global, social issues—offering a unique and critical perspective that separates it from other texts. Completely updated, this book includes twelve new chapters on the history of the social studies; democratic social studies; citizenship education; anarchist inspired transformative social studies; patriotism; ecological democracy; Native studies; inquiry teaching; Islamophobia; capitalism and class struggle; gender, sex, sexuality, and youth experiences in school; and critical media literacy. All the chapters from the previous edition have been thoroughly revised and updated, including those on teaching social studies in the age of curriculum standardization and high-stakes testing, critical multicultural social studies, prejudice and racism, assessment, and teaching democracy. Readers are encouraged to reconsider their assumptions and understanding about the origins, purposes, nature, and possibilities of the social studies curriculum.
