The science process skills form the foundation for scientific methods.

There are six basic science process skills:

- Observation •
- Communication •
- Classification •
- Measurement •
- Inference •

Prediction These basic skills are integrated together

Access Free Science

When scientists design and carry out experiments or in everyday life when we all carry out fair

SKILLS FORM 3~~

~~Times Bookstores~~

Abstract. There are many suggestions for what science process skills students should learn and experience, but the most important set of recommendations came in 1967 when a

Access Free Science

group of science
educators and
scientists at the
American Association
for the Advancement
of Science (AAAS)
studied scientists at
work and developed
a list of skills that
were widely used by
all scientists.
