DENSO SPARK PLUG CATALOG DOWNLOAD | SPARK PLUG ...

It is hard to pull out a winner in the NGK vs Denso debate since both are iridium spark plugs and offer almost similar performance. Denso plugs are installed on almost every automobile model manufactured in Japan. The iridium used in them has a superior hardness. The electrode's diameter in these plugs shrinks more than an NGK.

Denso TT or twin tip spark plugs are a low cost upgrade for standard copper plugs. Only 13 parts are required in the range to replace the standard copper plugs used in over 90% of vehicles on the UK's roads. Twin Tip technology uses a metal 'pad' on the ground electrode as well as having a narrower than standard centre electrode.

Industrial competition with rising economies, new regional investment from the West, and trade pacts among competitors threaten Japan's long postwar prominence. Global market dynamics and regional competition prompted the shift from offshore factories to local networks in the last decade. Similar forces are driving the recent formation of regional Nikkei - Japan-affiliated - nodes in major industrial clusters in Asia. The central concept of this volume, "knowledge networks," refers to interactive linkages around nodes of tacit and codified knowledge embedded in Global Value Chains. Through survey evidence and interviews at firms and factories this book reveals the problems facing knowledge transfer, such as persisting difficulties in communication, technology transfer, and indigenous learning in regional nodes of Nikkei Value Chains and the persistence of earlier patterns of hierarchical coordination in information flows despite the shift towards more horizontal network organization. However, a comparison of Nikkei knowledge networks in China, South Korea, and Thailand reveals the possibilities of an interactive learning community in cross-border investment. If Japan can meet the challenge of tapping Asia's offshore resources for innovation, it will pose a formidable global challenge to Western competitors.

Modern Motorcycle Technology offers motorcyclists an up-to-the-minute technical overview and explanation for all the major mechanical and electrical systems comprising their motorcycle. Whether you ride a sport bike, cruiser, tourer, dual-sport, or off-road machine you'll learn precisely how your bike works, which will help you keep your motorcycle in top condition. Author Massimo Clarke takes you through all the major components of your motorcycle focusing on subjects such as engine architecture, fuel systems, transmission, and chassis. The detailed text is accompanied by revealing photos and diagrams that illuminate precisely how these systems work. Whether new to motorcycling or a road-seasoned veteran rider, you'll find page after page of fascinating information. Modern Motorcycle Technology is the single reference you'll return to again and again.

Based on real-life experience and written by expert authors, the books in the Maintenance and Upgrades Manual series from Crowood will help owners develop the workshop skills needed for the maintenance and repair of their cars, and give guidance on possibilities for improvements and upgrades to performance. With step-by-step instructions and safety information throughout, this book is a valuable technical resource for owners of Mk1 and Mk2 Mazda MX-5s. Illustrated with over 700 colour photographs the book covers: tools and safety; weekly routine checks and twice-yearly checks, plus preparing for the MOT test; engine maintenance and tuning; gearbox and differential; brake maintenance and upgrades; uprating the suspension bushes and changing the springs and dampers; bodywork and hood maintenance and finally, what else can you do with an MX-5? Will be of interest to all amateur and professional motor mechanics and is superbly illustrated with over 700 colour photographs.

Ford's 4.6-liter-powered Mustang is the last remaining "classic" muscle car in the world and is incredibly popular with performance enthusiasts. More than 1,000,000 Mustangs have been built since 1996. Covers all 4.6 and 5.4-liter "Modular" motors--Ford's only V8 engine for Mustangs, fullsize cars, and light trucks from 1996 to 2004.

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.
