Static Electricity

Static electricity is due to electric charge that builds up on the surface of an insulator, such as a plastic comb. The charge that has built up cannot easily flow away from the insulator, which is why it is called static electricity.

~~Static Electricity Charge~~

~~Answer Sheet~~

Electrical charge An
electrical charge is

File Type PDF

Static Electricity

produced when an atom loses or gains an electron.

When there are more electrons than protons, the charge is negative.

When there are fewer electrons than protons, the charge is positive.

The unit of electrical charge is the coulomb (symbol: C). Electrical

current An electrical current is the movement of negative

Charge Answer
~~ELECTRICITY UNIT~~

~~Wilfrid Laurier~~

ANSWER KEY Static
Electricity Rubbing a
balloon with wool cloth
will create static
electricity charges. In
Picture 1, does the
balloon have a positive
charge, negative charge,
or no charge? neutral In
Picture 1, does the cloth
have a positive charge,

File Type PDF

Static Electricity

negative charge, or no
charge? neutral

~~Static Electricity – Super
Teacher Worksheets~~

This is addressed by
using a static charge
eliminator: a comb with
very fine conducting
threads or brushes that
touch the paper sheet at
many points on a single
line perpendicular to the
direction of paper

File Type PDF

Static Electricity

Charge Answer Sheet

motion. The threads rub the paper as it gets out of the printer; due to close proximity of the conducting threads and the paper, the threads and then the comb is able to collect and leak out excessive charge from the paper.
