Government response to HC 693, 2013-14 (ISBN 9780215071750). DFID's annual report for 2012-13 published as HC 12, session 2013-14 (ISBN 9780102983241)

The MoD is requesting net resources of some £39.8 billion and capital expenditure of some £10 billion for 2012-13. Within the total requested the MoD has asked from some £3.6 billion to cover the costs of operations, some 18 percent less than 1011-12. Resource expenditure is also planned to fall in line with the Spending Review 2010. The Committee recommends, along with other requests and general recommendations, that the Main Estimate for the MoD is approved by Parliament and have indentified no issues which require a debate before it does so

TERI Energy and Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by The Energy and Resources Institute (TERI) since 1986. It is the only comprehensive energy and environment yearbook in India which provides updated information on the energy supply sectors (coal and lignite, petroleum and natural gas, power, and renewable energy sources), energy demand sectors (agriculture, industry, transport, residential, and commercial sectors), and environment (local and global). It also provides a review of the government policies that have implications on energy and environment in India.Each edition of TEDDY contains India's commercial energy balances for the last four years that provide comprehensive information on energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable reference for researchers, scholars, and organizations working on energy and related sectors. After the introductory chapters, TEDDY has been divided into sections on energy supply, energy demand, and local and global environment. The twenty-ninth edition of the publication, TEDDY 2014/15, comes with several interesting features. The Green Focus at the end of each chapter highlights sustainable initiatives and successful practices. The publication also features a section with a discussion around sustainable development goals and tracking framework for sustainable energy goals at global, national, and sub-national levels. Graphs, maps, and tables have been used in all chapters to explain facts, which make the book an interesting read. In addition, detailed tables at the end of each chapter represent statistical data on energy and environment. The publication is accompanied by a complimentary CD containing full text. The publication is cited in international peer-reviewed journals and policy documents.

The India Policy Forum (IPF) is organized by the National Council of Applied Economic Research (NCAER) in New Delhi in partnership with the Brookings Institution, Washington, D.C. It aims to examine India's economic reforms and its economic transition using policy-relevant empirical research. The IPF comprises an annual international conference in July in New Delhi and the IPF Volume that brings together the conference papers. These papers undergo detailed revisions after the conference based on discussants' comments at the IPF and the guidance provided by the editors. The IPF is guided by distinguished international advisory and research panels. The first paper in this 2013 IPF Volume evaluates the impact of laws governing the operation of India's labour market within the organized industrial sector. The next paper analyzes India's role in the rapid development of international production networks. The third paper examines the conduct of Indian monetary policy since the onset of the global financial crisis, focusing on the persistent high rates of inflation in India. The fourth paper provides an overview of fiscal and monetary policies in the years after the financial crisis. The volume concludes with an assessment of the value of social audits, widely advocated as a tool for improving public accountability, in the MGNREGA program in Andhra Pradesh. The annual IPF Volume is globally the most cited collection of articles on India and should be useful to researchers and policy-makers in economics and political economy.
