Managing a project schedule seems like a straight-forward and explicit task. But when the concept of time is introduced, developing and managing a project schedule becomes greatly complicated, primarily because time is shaped by cultural influences. This paper examines how culture can affect a multicultural project team's orientation to time, and in turn, shape the team's project performance.

and an Innovation Specialist from McKinsey & Company debunk the myth that high-octane, built-to-last companies can continue to excel year after year and reveal the dynamic strategies of discontinuity and creative destruction these corporations must adopt in order to maintain excellence and remain competitive. In striking contrast to such bibles of business literature as *In Search of Excellence* and *Built to Last*, Richard N. Foster and Sarah Kaplan draw on research they conducted at McKinsey & Company of more than one thousand corporations in fifteen industries over a thirty-six-year period. The industries they examined included old-economy industries such as pulp and paper and chemicals, and new-economy industries like semiconductors and software. Using this enormous fact base, Foster and Kaplan show that even the best-run and most widely admired companies included in their sample are unable to sustain their market-beating levels of performance for more than ten to fifteen years. Foster and Kaplan's long-term studies of corporate birth, survival, and death in America show that the corporate equivalent of El Dorado, the golden company that continually outperforms the market, has never existed. It is a myth. Corporations operate with management philosophies based on the assumption of continuity; as a result, in the long term, they cannot change or create value at the pace and scale of the markets. Their control processes, the very processes that enable them to survive over the long haul, deaden them to the vital and constant need for change. Proposing a radical new business paradigm, Foster and Kaplan argue that redesigning the corporation to change at the pace and scale of the capital markets rather than merely operate well will require more than simple adjustments. They explain how companies like Johnson and Johnson, Enron, Corning, and GE are overcoming cultural "lock-in" by transforming rather than incrementally improving their

companies. They are doing this by creating new businesses, selling off or closing down businesses or divisions whose growth is slowing down, as well as abandoning outdated, ingrown structures and rules and adopting new decision-making processes, control systems, and mental models. Corporations, they argue, must learn to be as dynamic and responsive as the market itself if they are to sustain superior returns and thrive over the long term. In a book that is sure to shake the business world to its foundations, *Creative Destruction*, like *Re-Engineering the Corporation* before it, offers a new paradigm that will change the way we think about business.

Women with Attention Deficit Disorder, psychotherapist Sari Solden's, groundbreaking book, explains how every year, millions of withdrawn little girls and chronically overwhelmed women go undiagnosed with Attention Deficit Disorder because they don't fit the stereotypical profile: they're not fast-talking, hyperactive, or inattentive, and they are not male. This pioneering book explores treatment and counseling options, and uses real-life case histories to examine the special challenges women with AD/HD face, such as the shame of not fulfilling societal expectations. Solden explains that AD/HD affects just as many women as men, and often results in depression, disorganization, anxiety, and underachievement. Included in this revised edition is a brand new chapter on friendship challenges for women with AD/HD. Three empowering steps -- restructuring one's life, renegotiating relationships, and redefining self-image -- help women take control of their lives and enjoy success on their own terms. "Sari Solden has used her personal and professional experience to shine some light into the dark closet inhabited by far too many ADD women... She empowers ADD women by validating their experience as

These flexible assessments can be used both in correlation with the Primary Sources kits or as stand-alone practice pieces for a variety of standardized tests. Eleanor Roosevelt's remarkable ability to confront and overcome hurdles—be they political, personal, or social—made her one of the greatest leaders of the last century, if not all time. In *Leadership the Eleanor Roosevelt Way*, author and scholar Robin Gerber examines the values, tactics, and beliefs that enabled Eleanor Roosevelt to bring about tremendous change—in herself and in the world. Examining the former first lady's rise from a difficult childhood to her enormously productive and politically involved years in the White House, as a U.N. delegate and an honorary ambassador, an author, and beyond, Gerber offers women an inspiring road map to heroic living and an unparalleled model for personal achievement.
