A Point of View: The ethics of the driverless car - BBC News
Driverless cars are on the road in certain jurisdictions as they're being prepared for a mass market," says Millar, whose dissertation focuses on robot ethics and the implications of increasingly...

The ethics of driverless cars - Phys.org
Using the ACTIVE ethics framework, an ethical response to the fully autonomous driverless cars is developed by addressing autonomy, community, transparency, identity, value and empathy. I suggest that the pursuit of full autonomy does not recognise the essential importance of interdependencies between humans and machines.

The ethics of driverless cars | ACM SIGCAS Computers and ...
The U.S. government has clear guidelines for autonomous weapons—they can't be programmed to make "kill decisions" on their own—but no formal opinion on the ethics of driverless cars.

A Study on Driverless-Car Ethics Offers a Troubling Look ...
Self-driving cars are already cruising the streets today. And while these cars will ultimately be safer and cleaner than their manual counterparts, they can't completely avoid accidents altogether. How should the car be programmed if it encounters an unavoidable accident? Patrick Lin navigates the murky ethics of self-driving cars.

Patrick Lin: The ethical dilemma of self-driving cars ...
A driverless car will calculate a course of action based on how fast it is traveling as well as the speed of an object in its path, for example. The main challenge is in gathering and processing...

Driverless Cars Will Face Moral Dilemmas - Scientific American
Here are a few others—and surely there are many, many more: 1. The car itself Does it matter to ethics if a car is publicly owned, for instance, a city bus or fire truck? The owner... 2. Insurance How should we think about risks arising from robot cars? The insurance industry is the last line of ...

The Ethics of Autonomous Cars - The Atlantic
In this primer on the social dilemmas of driverless cars, Iyad Rahwan explores how the technology will challenge our morality and explains his work collecting data from real people on the ethical trade-offs we're willing (and not willing) to make. This talk was presented to a local audience at TEDxCambridge, an independent event.

Iyad Rahwan: What moral decisions should driverless cars ...
A lot of discussion and ethical thought about self-driving cars have focused on tragic dilemmas, like hypotheticals in which a car has to decide whether to run over a group of schoolchildren or...

In 2016 researchers at the MIT Media Lab launched Moral Machine, a game of ethics which presents players with the kind of road choices which driverless vehicles will soon have to make. Should a...

A Huge Global Study On Driverless Car Ethics Found The ...
Under the cold eye of a machine, morality is broken down into numbers. But humans may assess that the two lives in the car are worth more on the basis that one of them is an infant or child. It may be that driverless cars will integrate traffic camera technology to pre-empt emerging hazards and slow to a safe speed before the pedestrians step out.

The Ethics of Driverless Cars | MAT Foundry Blog
However, should an unavoidable crash situation arise, a driverless car's method of seeing and identifying potential objects or hazards is different and less precise than the human eye-brain connection, which likely will introduce moral dilemmas with respect to how an autonomous vehicle should react, according to Patrick Lin, director of the Ethics + Emerging Sciences Group at California Polytechnic State University, San Luis Obispo.

The Moral Challenges of Driverless Cars | August 2015 ...
However, with self-driving cars on the horizon, the question of how to program these autonomous vehicles to resolve ethical issues on the road has come to the forefront. Let's say your self-driving...
