In The Flooded Earth, species extinction expert Peter Ward describes in intricate detail what our world will look like in 2050, 2100, 2300, and beyond a blueprint for a foreseeable future. Ward also explains what politicians and policymakers around the world should be doing now to head off the worst consequences of an inevitable transformation.

The Flooded Earth: Our Future In a World Without Ice Caps ...

A professor of biology and Earth and space science, Peter D. Ward has not only a firm grasp on the reality of climate change but also the rare ability to explain its details in language even I can understand. The Flooded Earth did not leave me feeling particularly hopeful; this threat is real and imminent, with no easy solution. On the other hand, this is a book that puts into perspective our role in the problems and shows us with terrifying clarity where we stand and how we can best prepare ...
