The Great Britain Historical database (GBH) provides a large integrated database of geographically-located historical statistics for Great Britain, mainly drawn from the period 1851-1939. It is integrated in the sense that a large amount of work has gone into integrating the referencing of spatial units within the system and, where practical, into assembling data from different dates into single tables.

A portrait of world civilization told through the stories of the world's greatest cities from ancient times to the present. Today, for the first time in history, the majority of people in the world live in cities. The implications and challenges associated with this fact are enormous. But how did we get here? From the origins of urbanization in Mesopotamia to the global metropolises of today, great cities have marked the development of human civilization. The Great Cities in History tells their stories, starting with the earliest, from Uruk and Memphis to Jerusalem and Alexandria. Next come the fabulous cities of the first millennium: Damascus and Baghdad, Teotihuacan and Tikal, and Chang'an, capital of Tang Dynasty China. The medieval world saw the rise of powerful cities such as Palermo and Paris in Europe, Benin in Africa, and Angkor in southeast Asia. The last two sections bring us from the early modern world, with Isfahan, Agra, and Amsterdam, to the contemporary city: London and New York, Tokyo and Barcelona, Los Angeles and Sao Paulo. The distinguished contributors, including Jan Morris, Michael D. Coe, Simon Schama, Orlando Figes, Felipe Fernandez-Armesto, Misha Glenny, Susan Toby Evans, and A. N. Wilson, evoke the character of each place—people, art and architecture, government—and explain the reasons for its success.

History buffs love to immerse themselves in the details of past eras. But sometimes, one can get bogged down in the minutia of times gone by and fail to grasp the significance of the bigger picture. This volume from historian James Jhonnnot is the antidote to overly compartmentalized history texts, offering a broad perspective on the major events that coalesced to shape the world we live in.

The potato chip has been one of America’s favorite snacks since its accidental origin in a nineteenth-century kitchen. Crunch! A History of the Great American Potato Chip tells the story of this crispy, salty treat, from the early sales of locally made chips at corner groceries, county fairs, and cafes to the mass marketing and corporate consolidation of the modern snack food industry. Crunch! also uncovers a dark side of potato chip history, including a federal investigation of the snack food industry in the 1990s following widespread allegations of antitrust activity, illegal buyouts, and predatory pricing. In the wake of these "Great Potato Chip Wars," corporate snack divisions closed and dozens of family-owned companies went bankrupt. Yet, despite consolidation, many small chippers persist into the twenty-first century, as mom-and-pop companies and upstart "boutique" businesses serve both new consumers and markets with strong regional loyalties. Illustrated with images of early snack food paraphernalia and clever packaging from the glory days of American advertising art, Crunch! is an informative tour of large and small business in America and the vicissitudes of popular tastes.

The New York Times bestselling author of The Forgotten Man and Coolidge offers a stunning revision of our last great period of idealism, the 1960s, with burning relevance for our contemporary challenges. "Great Society is accurate history that reads like a novel, covering the high hopes and catastrophic missteps of our well-meaning leaders." —Alan Greenspan Today, a battle rages in our country. Many Americans are attracted to socialism and economic redistribution while opponents of those ideas argue for purer capitalism. In the 1960s, Americans sought the same goals many seek now: an end to poverty, higher standards of living for the middle class, a better environment and more access to health care and education. Then, too, we debated socialism and capitalism, public sector reform versus private sector advancement. Time and again, whether under John F. Kennedy, Lyndon Johnson, or Richard Nixon, the country chose the public sector. Yet the targets of our idealism proved elusive. What’s more, Johnson’s and Nixon’s programs shackled millions of families in permanent government dependence. Ironically, Shlaes argues, the costs of entitlement commitments made a half century ago preclude the very reforms that Americans will need in coming decades. In Great Society, Shlaes offers a powerful companion to her legendary history of the 1930s, The Forgotten Man, and shows that in fact there was scant difference between two presidents we consider opposites: Johnson and Nixon. Just as technocratic military planning by “the Best and the Brightest” made failure in Vietnam inevitable, so planning by a team of the domestic best and brightest guaranteed fiasco at home. At once history and biography, Great Society sketches moving portraits of the characters in this transformative period, from U.S. Presidents to the visionary UAW leader Walter Reuther, the founders of Intel, and Federal Reserve chairmen William McChesney Martin and Arthur Burns. Great Society casts new light on other figures too, from Ronald Reagan, then governor of California, to the socialist Michael Harrington and the protest movement leader Tom Hayden. Drawing on her classic economic expertise and deep historical knowledge, Shlaes upends the traditional narrative of the era, providing a damning indictment of the consequences of thoughtless idealism with striking relevance for today. Great Society captures a dramatic contest with lessons both dark and bright for our own time.
