The Master Plan is a groundbreaking  
expose of the work of German scientists  
and scholars who allowed their research to  
be warped to justify extermination, and  
who directly participated in the slaughter  
-- many of whom resumed their academic  
positions at war's end. It is based on  
Heather Pringle's extensive original  
research, including previously ignored  
archival material and unpublished  
photographs, and interviews with living  
members of the institute and their  
survivors.
