Provides an investigation of the reasons behind, and the cover-up of the steamboat explosion which took the lives of 1,800 Union soldiers in 1865

Lee Surrenders! "President Murdered!" "Booth Killed!" screamed the headlines of American newspapers in April 1865, leaving little room for mention of a maritime disaster that to this day is America's worst. On April 27, 1865, the Sultana, a 260-foot, wooden-hulled steamboat-smaller than the Titanic but carrying more passengers-exploded on the Mississippi River near Memphis, Tennessee. More than 1,800 men, mostly Union soldiers on their way home from Confederate prison camps, died. On board were over 2,400 passengers-six times the ship's legal capacity. Although jubilant about the war's end, most of the men were weakened by malnutrition and disease from their imprisonment at Andersonville and Cahaba. Hundreds who were not killed in the explosion drowned in the cold, swift waters of the muddy river. Because of the timing of the sinking, coverage of the Sultana's demise was scant, and the tragedy has passed almost unnoticed in the pages of American history. In this highly documented book, author Jerry Potter focuses on how greed, indifference, gross stupidity, and criminal misconduct reaching as far as the White House led to the overloading of the Sultana at Vicksburg. Such irresponsible conduct characterized the actions of President Lincoln, an entire chain of army command, and several profit-hungry civilians. This authoritative work contains abundant photographs and illustrations, as well as the most complete list of the ship's passengers available.

At two o'clock in the morning on 27 April 1865, seven miles north of Memphis on the Mississippi, the sidewheel steamboat Sultana's boilers suddenly exploded. Legally registered to carry 376 people, the boat was packed with 2,100 recently released Union prisoners-of-war. Over 1,700 people died, making it the worst marine disaster in U.S. history. This book looks at the disaster through the eyes of the victims themselves. It offers a concise, minute-by-minute account on the cause of the explosion and its effect on different parts of the boat. To focus on the personal stories of the victims, both civilian and soldier, Gene Eric Salecker patiently collected material from hundreds of letters, period newspaper stories, and other sources. Readers are first introduced to victims while they are languishing in Confederate prisons and follow their release to an exchange camp outside of Vicksburg to their eventual crowding onto the Sultana. His knowledgeable narrative is interwoven with individual reminiscences, including those of the heroic rescuers. He offers unprecedented details about the captain's handling of the steamboat and corrects some long-held myths about the placement of the soldiers on the Sultana and newspaper coverage of the disaster. A large portion of the book covers rescue attempts, both successful and failed, and the aftermath of the disaster as it affected those involved. With its emphasis on the human-interest aspect of the Sultana, this book brings to the literature a critical point of view and much new research.

The worst maritime disaster in American history wasn't the Titanic. It was the steamboat Sultana on the Mississippi River – and it was completely preventable. In 1865, the Civil War was winding down and the country was reeling from Lincoln's assassination. Thousands of Union soldiers, released from Confederate prisoner-of-war camps, were to be transported home on the steamboat Sultana. With a profit to be made, the captain rushed repairs to the ship so the soldiers wouldn't find transportation elsewhere. More than 2,000 passengers boarded in Vicksburg, Mississippi . . . on a boat with a capacity of 376. The journey was violently interrupted when the ship's boilers exploded, plunging the Sultana into mayhem; passengers were bombarded with red-hot iron fragments, burned by scalding steam, and flung overboard into the churning Mississippi. Although rescue efforts were launched, the survival rate was dismal – more than 1,500 lives were lost. In a compelling, exhaustively researched account, renowned author Sally M. Walker joins the ranks of historians who have been asking the same question for 150 years: who (or what) was responsible for the Sultana's disastrous fate?

Running from New Orleans to St. Louis in the summer of 1870, the race between the Robert E. Lee and the Natchez remains the world's most famous steamboat race. This book tells the story of the dramatic contest, which was won by the stripped-down, cargoless Robert E. Lee after three days, 18 hours, and 14 minutes of steaming through day, night and fog. The Natchez finished the race only hours later, having been delayed by carrying her normal load and tying up overnight because of the intense fog. Providing details on not only the race narrative but also on the boats themselves, the book gives an intimate look at the majestic vessels that conquered the country's greatest waterway and defined the bravado of 19th-century America.

Five major historians return to the battlefield to explain the South's defeat. Provocatively argued and engagingly written, this work rejects the notion that the Union victory was inevitable and shows the importance of the commanders, strategies, and victories at key moments.

Winner, The Grateful American Book Prize Leander and Polly are two teenage Union soldiers who carry deep, dangerous secrets. Leander is underage when he enlists and Polly follows her father into war disguised as his son. The war proves life changing for both as they survive incredible odds. Leander struggles to be accepted as a man and loses his arm as a consequence. Polly mourns the death of her father, endures Andersonville Prison, and narrowly escapes the Sultana steamboat disaster. As the lives of these young, brave soldiers intersect, each finds a wealth of courage and learns about the importance of loyalty, family, and love. Like a River is a lyrical atmospheric first novel told in two voices. Readers will be transported to the homes,waterways, camps, hospitals, and prisons of the Civil-War era. They will also see themselves in the universal themes of dealing with parents, friendships, bullying, failure, and young love.

Are you ready to learn something new? The 2nd volume in the Knowledge Stew Guide series continues the quest to find the most interesting facts in the world. Take a journey through topics that range from science, history, and geography to food, entertainment, and business and learn the facts behind the facts. Discover things you might not have known about the moon, or why we're taller in the morning and shorter at night. Find out about a strange amusement park, a secret vault at Mt. Rushmore, or the world's most expensive coffee. These things, plus plenty more, are waiting for your brain to take them in. Just don't forget your

spoon. For even more facts, check out Volume 1 of Knowledge Stew: The Guide to the Most Interesting Facts in the World.

This the 100th anniversary of one of worst man-made disasters of the 20th century. When the Iroquois Theatre opened in Chicago on November 23, 1903, it was considered one of the grandest structures of its day, a monument to modern design and technology, as well as "absolutely fireproof." This was a theatre that would rival any in New York or Paris. Instead it became the funeral pyre for hundreds of victims. Tony Hatch, former CBS reporter and Emmy Award winner, tells the grisly story in meticulous, riveting detail, based on more than forty years of research, including many exclusive interviews with eyewitnesses. In Tinder Box, he tells the Iroquois story as it has never been told before. In a rush to open the theatre on time, corners were cut, and the Iroquois lacked the most basic fire-fighting equipment: sprinklers, fire alarm boxes, backstage telephone, exit signs and functioning asbestos curtain. Some exists, for aesthetic reasons, were hidden behind heavy draperies, doors opened inward and exterior fire escapes were unfinished. But Chicago officials, the theatre owners and managers, the contractor, stagehands—all looked the other way. Then, on December 30, 1903, disaster struck. The theatre was packed, overcrowded with a standing-room-only audience, mostly women and children who had come to see the popular comedian Eddie Foy perform in the musical fantasy Mr. Bluebeard. A short circuit in a single backstage spotlight touched off a small fire that, in minutes, erupted into an uncontrollable blaze. More than 600 people died. Because of the magnitude of the catastrophe and the obvious corruption that allowed it to happen, building and fire laws were changed to prevent it everhappening again. Tinder Box is a riveting history of a traumatic and costly calamity.
