Confidence about where we are in a cycle comes when you learn the patterns of ups and downs that influence not just economics, markets, and companies, but also human psychology and the investing behaviors that result. If you study past cycles, understand their origins and remain alert for the next one, you will become keenly attuned to the investment environment as it changes. You'll be aware and prepared while others get blindsided by unexpected events or fall victim to emotions like fear and greed. By following Marks's insights—drawn in part from his iconic memos over the years to Oaktree's clients—you can master these recurring patterns to have the opportunity to improve your results.
