The Low Carbon Cities Framework

Read PDF Towards Low Carbon Cities In China

(LCCF) was initiated to provide a framework to achieve sustainable development that will subsequently reduce carbon dioxide emission. LCCs are cities that apply serious and effective activities to decline their environmental impact and their carbon dioxide emission. Low carbon cities have four main focus areas on

Living labs for sustainability and low

Read PDF Towards Low Carbon Cities In China

carbon cities emerging in Europe have different goals and ways of working, they are initiated by various actors, and they form different types of partnerships. There is clearly no uniform definition of living labs (Schliwa, 2013, Ståhlbröst, 2008, Hillgren, 2013).
