The Japanese people are again struggling with their nation's insularity. The Meiji Restoration and the end of the Asia-Pacific War gave way to concerted efforts to connect the country with the outside world. As the Japanese economy emerged from two decades of stagnant growth, there was wide consensus that the society was increasingly grappling with the problems shared globally, and that both its economy and internal policy debates would benefit from being more fully engaged in discourses and research activity occurring outside its borders. This book considers the efforts of policy makers to reorient Japan to the outside world, as the nation enters the second decade of the 21st century. It discusses the strategies being pursued by Japan's policy makers: enhancing the involvement of the Japanese in global networks * improving English language skills * hiring more foreign labor * lifting the stature of tertiary education on internationally recognized league tables * creating favorable images of a Japanese cultured society abroad. The book considers the changing geopolitical landscape and the social backdrop against which such policies are being introduced, while also assessing the prospects that the Japanese will experience a "third opening" any time soon. Overall, the volume provides insight into some of the critical choices likely to shape Japan's interface with the outside world and the direction in which Japanese society moves during the next decade. eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the "right product at the right time" and "the most significant new car since the Ford Model T was introduced 100 years ago"? But is it really all over or is there still hope for India's "little wonder"? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true "people's car". The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.
