they fought their way through a remote valley in eastern Afghanistan. Over the course of five trips, Junger was in more firefights than he could count, as men he knew were killed or wounded and he himself was almost killed. His relationship with these soldiers grew so close that they considered him part of the platoon, and he enjoyed an access and a candidness that few, if any, journalists ever attain. War is a narrative about combat: the fear of dying, the trauma of killing and the love between platoon-mates who would rather perish than let each other down. Gripping, honest and intense, War explores

the neurological, psychological and social elements of combat, as well as the incredible bonds that form between these small groups of men. This is not a book about Afghanistan or the “War on Terror”; it is a book about all men, in all wars. Junger set out to answer what he thought of as the “hand-grenade question”: why would a man throw himself on a hand grenade to save other men he has known for probably only a few months? The answer is elusive but profound, going to the heart of what it means not just to be a soldier, but to be human.

violence—comes with organized society. War has shaped humanity's history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we

fight. War: How Conflict Shaped Us explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.

In *Bound by War*, historian Christopher Capozzola reveals this forgotten history, showing how war and military service forged an enduring, yet fraught, alliance between Americans and Filipinos. As the US military expanded in Asia, American forces confronted their Pacific rivals from Philippine bases. And from the colonial-era Philippine Scouts to post-9/11 contractors in Iraq and Afghanistan, Filipinos were crucial partners in the exercise of US power. Their service reshaped Philippine society and politics and brought thousands of Filipinos to America.

an experience of victimization—and one that saw Mao Zedong and Chiang Kai-shek fighting for the same goals. But now, as China grows more powerful, the meaning of the war is changing. Rana Mitter argues that China's reassessment of the war years is central to its newfound confidence abroad and to mounting nationalism at home. China's Good War begins with the academics who shepherded the once-taboo subject into wider discourse. Encouraged by reforms under Deng Xiaoping, they researched the Guomindang war effort, collaboration with the Japanese, and China's role in forming the post-1945 global order.

But interest in the war would not stay confined to scholarly journals. Today public sites of memory—including museums, movies and television shows, street art, popular writing, and social media—define the war as a founding myth for an ascendant China. Wartime China emerges as victor rather than victim. The shifting story has nurtured a number of new views. One rehabilitates Chiang Kai-shek's war efforts, minimizing the bloody conflicts between him and Mao and aiming to heal the wounds of the Cultural Revolution. Another narrative positions Beijing as creator and protector of the international
