*Introduction to water supply
engg. by Prof. D S.Shah*

Looking after our water resources has never been more important or more challenging. The world needs engineering graduates who can tackle the problems of flooding, pollution and infrastructure design. Our large multidisciplinary water research group drives our research-led teaching and module content. You'll cover essential engineering principles like fluid mechanics, chemistry, hydrology ...

What does a water engineer do? - CareerExplorer

Hydraulic engineering as a sub-discipline of civil engineering is concerned with the flow and conveyance of fluids, principally water and sewage. One feature of these systems is the extensive use of gravity as the motive force to cause the movement of the fluids. This area of civil engineering is intimately related to the design of bridges, dams, channels,
