this charming picture book that celebrates being different. A boy likes to dress as a cat, but his best friend's dog objects. What will he dress as now? A giraffe? A fox? A shark? When his best friend, Camille, suggests a frog, they work together to make the frog costume...until Camille runs out of patience. So the boy makes a list of the pros and cons of being a frog: Pros: 1. My friend Camille gave me the idea 2. I'm less likely to be chased by a dog 3. Being in a frog costume makes me feel brave Cons: 1. Not everyone loves wearing a frog costume as much as me 2. If you start getting bossy about your frog costume then your friend will get up and leave 3. A frog is NOT a solitary creature so it is no fun for a frog if his friend gets up and leaves Luckily, he won't have to choose, because true friendship means accepting each other's differences: he can be himself and have his friend Camille.

Bachelor Thesis from the year 2008 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,2, Maastricht University (School of Business and Economics), course: -, language: English, abstract: 1. General introduction Up to now, it has always been the task of marketing to be close to the customer and to know how to reach him in order to ultimately increase sales of the company's product or service. This focus on customer acquisition is widespread among companies, and many companies consider this to be sufficient in order to survive in the business world. Nonetheless, a vital flaw of this common view is that there is more than just focusing all efforts on acquiring new customers - That is, convincing the customer that it pays for him/her to continue doing business with the provider, which is called customer retention. Management (CRM). Throughout this paper, the definition of a CRM will be equivalent to the interpretation by Payne and Frow (2005), who state that CRM is a strategic approach that is concerned with creating improved shareholder value through the development of appropriate relationships with key customers and customer segments (Payne and Frow, 2005a). In the 1990s, organizations recognized the need for not relying on customer acquisition all alone, and stressing the relationship with the customer became imperative in the business world's strategic orientation.

Unfortunately, implementing CRM systems turned out to require more work than the plain desire to be chosen as a provider over and over again. A great source of uncertainty was the vague definition of relationship management itself. Another pitfall was how to establish a CRM system in an organization. As relationship management was not up to executives' expectations, many companies were disappointed by the results - And yet, there were companies that succeeded in implementing a CRM system.
