A guide to dealing with non-Alzheimer's dementias defines frontotemporal degeneration and provides information on diagnosis, managing care, finding the right doctors and managing care for a loved one. Simultaneous eBook.

Includes Vital Information on Frontotemporal Dementia (FTD)Foreword by John Q. Trojanowski, MD, PhD, Director, Alzheimer's Disease Center, University of Pennsylvania HospitalAlthough the public most often associates dementia with Alzheimer's disease, the medical profession now distinguishes various types of other dementias. This book is the first comprehensive guide dealing with frontotemporal dementia (FTD), one of the largest groups of non-Alzheimer's dementias. The contributors are either specialists in their fields or have exceptional hands-on experience with FTD sufferers.Beginning with a focus on the medical facts, the first part defines and explores FTD as an illness distinct from Alzheimer's disease. Also considered are clinical and medical care issues and practices, as well as such topics as finding a medical team and rehabilitation interventions. The next section on managing care examines the daily care routine including exercise, socialization, adapting the home environment, and behavioral issues. In the following section on caregiver resources, the contributors identify professional and government assistance programs along with private resources and legal options.This newly revised edition follows recent worldwide collaboration in research and provides the most current medical information available, a better understanding of the different classifications of FTD, and more clarity regarding

the role of genetics. A completely new chapter 5 enlightens the reader about the various drugs that are now being used with FTD patients and also delves into a number of nonmedical options. The wealth of information offered in these pages will help both healthcare professionals and caregivers of someone suffering from frontotemporal dementia. Lisa Radin and her son, Gary Radin, provided complete care for father and husband Neil Radin over a four-year period. Based on this firsthand experience with a devastating illness, they compiled this collection of expert articles on FTD by medical specialists, healthcare professionals, and fellow caregivers. Gary and Lisa founded in 1998 the Neil L. Radin Caregivers Relief Foundation and were both involved in planning and coordinating the Multidisciplinary Conference on Picks Disease & Frontotemporal Dementia held in May 1999 in Philadelphia; the proceedings of this conference were published in Neurology. Lisa also provided organizational support for the Frontotemporal Dementia and Pick's Disease Criteria Conference held at the National Institutes of Health in July 2000 in Bethesda, MD.

Although the public most often associates dementia with Alzheimer ' s disease, the medical profession now distinguishes various types of " other " dementias. This book is the first and only comprehensive guide dealing with frontotemporal degeneration (FTD), one of the largest groups of non-Alzheimer ' s dementias. The contributors are either specialists in their fields or have exceptional hands-on experience with FTD sufferers. Beginning with a focus on the medical facts, the first part defines and explores FTD as an illness distinct from Alzheimer ' s disease. Pam Ostrowski's guidebook, *It's Not That Simple*, walks you through what can happen and prepares you for the challenges you may face. Seemingly small tasks, such as who's going to attend doctor's appointments or who will bathe them, become overwhelming without proper planning and support. This book provides practical tips, coping tools for caring for those with Alzheimer's, and conversation starters for those difficult talks you may have with your loved one and family members. This knowledge allows you to anticipate and prepare for the future and reduces frustration, burnout, and compassion fatigue. Being a caregiver can be a transformational experience. This book provides a way to look at this journey a bit differently, not as a list of challenges, but as a way to expand your heart and transform the way you treat others. It provides examples on how to embrace the best mindset for dealing with this long-term disease. Your support role and responsibilities over these years are critical to all concerned. This book will help you make the best legal, logistical, medical, and emotional decisions. Learn how to communicate with Alzheimer's sufferers, handle disagreements so they result in positive outcomes, and understand the stages and behaviors of Alzheimer's disease. The more knowledge you have, the easier it will be to care for your loved one and offer support to everyone involved. Join Pam as she walks through her personal journey with her mother who suffered from Alzheimer's, sharing the lessons she learned that expanded her heart and allowed her to embrace the value of compassion, empathy, and dignity over her 14-year experience.
